AC Spin Classes

Our Spin Instructors offer a variety of spin classes that can help strengthen your body, improve your range of motion and flexibility, while increasing stamina and endurance. Choose from our 6 class types to suit your needs, along with our "new" ICG Technology, these classes will give you just what you are looking for. As our Instructors will say "when your body works the bike, the bike works your body"

Edge: The next edge you will find is the edge of your comfort zone, so get ready to jump right out of it and add more gear! Exercise is the connection of the mind and body. This class will be a combination of sprints, climbs and teaching your mind and body how to push past that edge.

Power: Push yourself outside of your comfort zone. This class will have you smiling and sweating. This spin class includes series of interval sprints, jogs, and endurance drills all backed by sweet beats that help you power through.

Rhythm & Spin Plus: These classes will have you riding to the beat of the music and offers upper body movements on the bike! Join us for this upbeat, motivating class that will leave you feeling energized. May incorporate weights for an added challenge.

Spin n' Sculpt: This class combines a 25min cycle with 20 min of core/upper body exercises that will push you to reach your maximum goal while working at your own pace.

Virtual Coach by colour®: Let the ICG virtual coach bring a simple and intuitive form of communication to you during your class to improve your experience and to achieve your fitness results in less time. The Coach by Color® power program combines accurate zonal training with stimulating color to help coach your efforts during the workout. This workout will be projected to a screen with a virtual instructor.

Zone: Get your weekend started with a ride that will get you in "the zone". Experience a full ride of climbing, racing, endurance rides and power sprints. This interval based class simulates real riding and will take you through various intensity zones that help you lose fat, get lean, increase metabolism and improve cardiovascular endurance.
